Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 2621

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1, 5, 14 are rejected under 35 U.S.C. 102(e) as being anticipated by Sambonsugi et al [U. S. Patent No. 6,335,985].

As to claim 14, Sambonsugi et al disclose a method for extracting an object from an image, comprising steps of: receiving a query image including an object and an object extraction target image from which the object included in the query image is to be extracted (Fig. 2, item 11; Fig. 9, item 9; col. 11, lines 28-35; col. 20, lines 27-32; i.e., one input frame is a query image, and other input frame is an object extraction target image); determining a position of the object in the object extraction target image using pixel based color feature matching (col. 11, lines 32-50; col. 15, lines 52-66); segmenting each of the query image and the object extraction target image into a plurality of regions using image features including color or texture (col. 21, lines 18-22); and performing matching between the segmented regions in the query image and the segmented regions in the determined position of the object in the object extraction target image using color or texture features and determining a final object region using similarity in spatial adjacency between matching regions obtained as a result of the matching col. 20, line 52-col. 21, line 4).

Claims 1, 5 are simply directed to an apparatus corresponding to the method of claim 14. They recite similar limitations of claim 14. Therefore, they are rejected for the same reasons.

Art Unit: 2621

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claim 32 is rejected under 35 U.S.C. 103(a) as being unpatentable over Sambonsugi et al.

Although Sambonsugi et al do not disclose using a computer readable recording medium for recording a program which executes the method of claim 14, such software implementation of the method of claim 14 would have been obvious to one of ordinary skill in the art. It is simply an obvious matter of design choice.

5. Claims 2-4, 6-13, 15-31 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Phuoc Tran whose telephone number is (703) 305-4861. The examiner can normally be reached on MON-FRI.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Bhavesh Mehta can be reached on (703) 308-5246. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
